

CONTENTS

0	Non-technical summary	6
1	Introduction	10
1.1	Background information	10
1.2	Project proposal	11
1.3	The Project Proponent	12
1.4	EIA preparers	13
1.5	Legal requirements and guidelines for EIA	13
1.5.1	Environmental Protection Act of 2002, as amended	13
1.5.2	Other environmental standards and regulations	14
1.5.3	Regulations of the Department of Aviation	15
1.5.4	International Conventions and guidelines	16
2	Site and Project description	17
2.1	Site description	17
2.1.1	Location and setting of the Project site	17
2.1.2	Ownership of land	18
2.1.3	Project location	19
2.1.4	Topographical survey	19
2.1.5	Zoning	19
2.1.6	Plan and policies	19
2.1.7	Site characteristics	19
2.1.8	Certified site and location plans	20
2.1.9	Current land use	20
2.1.10	Agricultural soil	22
2.1.11	Flora and fauna	22
2.2	Project description	22
2.2.1	Project initiator	22
2.2.2	Type, need and justification of the project	22
2.2.3	Scale of the Project	25
2.2.4	Design of the project	25

2.2.5	Development of basal engineering infrastructure	28
2.2.6	Operation of the landfill	29
2.2.7	Removal/replacement of existing facilities	29
2.2.8	Methods of soil works and construction works	30
2.2.9	Equipment for vertical expansion works	33
2.2.10	Training requirements of the project	33
2.2.11	Sketches of the landfill surface and surroundings	33
2.2.12	Proposed schedule of implementation	35
3	Method of assessment	39
3.1	Baseline data	39
3.2	Terms of Reference	39
3.3	Scoping	40
3.4	Data collection to describe baseline conditions	40
3.5	Baseline meteorological conditions	41
3.5.1	Rainfall and evaporation	41
3.5.2	Wind	44
3.5.3	Cyclones	44
3.5.4	Climate change issues	44
3.6	Topography	46
3.7	Hydrology	47
3.8	Geology	47
3.9	Hydrogeology	50
3.9.1	Hydrogeological setting	50
3.9.2	Groundwater flow	51
3.9.3	Groundwater quality in drainage chambers	52
3.9.4	Quality of groundwater in deep wells	55
3.9.5	Groundwater use	57
3.10	Leachate management	57
3.11	Landfill gas management	59
3.12	Ecology	61
3.13	Landscape and visual impression	62
3.14	Traffic	64
3.15	Noise and vibration	65
3.16	Air quality	66
3.17	Socio-cultural context	67
3.18	Consultations	68
3.18.1	Identified stakeholders	68
3.18.2	Project beneficiaries	69
3.18.3	Key issues arising from consultations	69
4	Predicted environmental impacts and mitigation measures	71
4.1	Introduction	71
4.2	Land use and water runoff	71

4.2.1	Impacts	71
4.2.2	Mitigation measures	72
4.3	Impact of leachate	74
4.3.1	Impacts	74
4.3.2	Mitigation measures	75
4.4	Impacts of landfill gas	77
4.4.1	Impacts	77
4.4.1	Mitigation measures	78
4.5	Impacts on air quality and odour nuisance	83
4.5.1	Impacts	83
4.5.2	Mitigation measures	84
4.6	Ecological impacts	85
4.7	Visual impact	85
4.7.1	Impacts	85
4.7.2	Mitigation measures	86
4.8	Traffic impacts	86
4.8.1	Impacts	86
4.8.2	Mitigation measures	87
4.9	Noise and vibration nuisance	88
4.9.1	Impacts	88
4.9.2	Mitigation measures	88
5	Socio-economic and socio-cultural impacts and mitigation measures	90
5.1	Impact on land and property value	90
5.1.1	Impacts	90
5.1.2	Mitigation measures	90
5.2	Impacts on SSR airport conditions	90
5.2.1	Impacts	90
5.2.2	Mitigation measures	90
5.3	Odour problems	90
6	Residual impacts	92
6.1	Introduction	92
6.2	Loss of flora and fauna within the land strip	92
6.3	Change of landscape	92
6.4	Leachate generation	92
6.5	Landfill gas generation	93
6.6	Occupational Health and Safety	93
6.7	Socio-cultural and socioeconomic impacts	93
7	Monitoring and maintenance	95
7.1	Introduction	95
7.2	Current environmental monitoring program for the Mare Chicose site	95

7.2.1	Monitoring of groundwater quality	95
7.2.2	Surface water monitoring	95
7.2.3	Split Sampling Program	96
7.2.4	Leachate Monitoring	96
7.2.5	Monitoring of landfill gas migration	96
7.3	Contractor personnel	97
7.4	Environmental Management Plan	97
7.5	Audit reports	97
8	Enhancement opportunities	98
8.1	Introduction	98
8.2	Enhanced performance of contractor	98
8.3	Enhanced supervision and audit program	98
8.4	Enhanced environmental monitoring program	99
8.5	Enhanced planning of waste disposal	99
8.6	Opportunities for other use of the site	99
9	Alternatives	100
9.1	Overview of considered alternatives	100
9.2	Alternative with no Project	100
9.3	Alternative locations for landfilling	101
9.4	Alternative waste disposal technologies	101
9.5	Alternative engineering methods for vertical expansion	101
9.5.1	Alternative construction materials	104
10	Conclusions and recommendations	106
10.1	Introduction	106
10.2	Potential environmental and social impacts	106
10.2.1	Main beneficial impacts	109
10.2.2	Main negative impacts	110
10.3	Alternative options	110
10.4	Conclusions and recommendations	110

APPENDICES

Appendix 1 Examples of high facilities for waste disposal

Appendix 2 Correspondence with the Department of
Civil Aviation

- Appendix 3 Correspondence with the land owner about leasing of the land strip along the landfill border
- Appendix 4 Layouts of the existing landfill
- Appendix 5 Tentative programme of works for phased implementation of the Project
- Appendix 6 Data from meteorological station Plaisance
- Appendix 7 Documentation on consultations with stakeholders
- Appendix 8 Map of additional geotechnical investigations launched in 2019
- Appendix 9 Data on groundwater monitoring for the landfill site
- Appendix 10 Full suite of parameters monitored at the Mare Chicose landfill
