

**FERME MARINE DE MAHEBOURG
EXPANSION OF THE EXISTING FISH FARMING ACTIVITY
WITH THREE ADDITIONAL DECLARED FISH FARMING ZONES**

ENVIRONMENTAL IMPACT ASSESSMENT REPORT

TABLE OF CONTENTS

EXECUTIVE SUMMARY	
1	INTRODUCTION.....1-1
1.1	Background Information1-1
1.1.1	The Proponent1-1
1.1.2	Code of Practices & Certification at FMM1-2
1.2	The Project in Brief1-3
1.3	The Project Team1-4
1.4	Justification of the Project.....1-4
1.5	The Timeframe for Project Implementation1-5
1.6	Scope and Methodology of the Environmental Impact Assessment1-5
1.7	Liaison with Authorities and Stakeholders.....1-5
1.7.1	Consultation with Relevant Authorities1-5
1.7.2	Public Participation Process1-6
1.7.3	Permit / Clearances Requested and Obtained1-6
1.8	Structure of the EIA Report1-6
2	ENVIRONMENTAL POLICY, INSTITUTIONAL AND LEGAL FRAMEWORK2-1
2.1	The Environment Protection Act 20022-1
2.1.1	The Act2-1
2.1.2	The Requirement for Environmental Impact Assessment (EIA).....2-1
2.1.3	Environmental Protection Standards and Guidelines2-2
2.2	Other Main Applicable Legislation and Policies2-3
2.2.1	Developpement de L'Aquaculture à L'île Maurice, Etude du Potentiel Aquacole” (Aquaculture Master Plan 2007), Board of Investment & IDEE, November 20072-3
2.2.2	Potential for Sustainable Aquaculture Development in Mauritius, Board of Investment & Ministry of Agro-Industries and Fisheries (Fisheries Division), December 20072-3
2.2.3	The Fisheries and Marine Resources Act 20072-4
2.2.4	The Maritime Zone Act 2005.....2-5
2.2.5	National Environmental Strategies2-5
2.2.6	The National Biodiversity Strategic and Action Plan (2006-2015)2-5
2.2.7	The Planning and Development Act 2004 and National Development Strategy 20032-5
2.3	International Treaties and Agreements.....2-6
3	HIGHLIGHTS OF THE FISHING SECTOR IN MAURITIUS.....3-1
3.1	Artisanal Fisheries – National Overview3-1
3.2	Artisanal Fisheries in the South East of Mauritius.....3-2
3.3	Aquaculture3-2
4	SITE AND PROJECT DESCRIPTION4-1
4.1	Site Description4-1
4.1.1	Concession of Area in Fish Farming Zones.....4-1
4.1.2	FMM Existing Fish Farms4-1
4.1.3	FMM Proposed New Fish Farms.....4-2
4.1.4	Zoning & Land Extent4-3
4.1.5	Similar Activities in the Area4-3
4.2	Project Description4-4
4.2.1	Principle, Concept and Purpose of Farm4-4
4.2.2	Design, Size and Scale of Project.....4-4
4.2.3	Capacity of Farm4-6
4.2.4	Artisanal and Ecological Approach4-8
4.2.5	Low Density Approach.....4-8
4.2.6	Quality of fish to be farmed (certification)4-9
4.2.7	Source and Volume of Fingerlings.....4-9
4.2.8	Fish Feed4-9
4.2.9	Chemical-free Fish Farming.....4-10
4.2.10	Contingency plan.....4-12
5	SOCIAL AND ECONOMIC ENGAGEMENT OF FMM5-1
5.1	Growth in employment5-1

5.2	Youth employment.....	5-1
5.3	Aquaculture Diver Training.....	5-1
5.4	School Visits.....	5-2
5.5	Literacy, First Aid and HACCP Courses.....	5-2
5.6	Recycling of Treated Effluent from the Fish Processing for Irrigation.....	5-3
5.7	Sponsoring of Local Sports and Other Activities.....	5-4
5.8	Encouraging Local Production of Aquaculture Equipment and Fish Feed.....	5-4
6	DESCRIPTION OF EXISTING ENVIRONMENT.....	6-1
6.1	The Study Area.....	6-1
6.2	Scope and Methodology of Surveys.....	6-1
6.3	Geomorphology and Biodiversity Survey.....	6-1
6.3.1	Study Zone.....	6-1
6.3.2	Scope of Study.....	6-2
6.3.3	Purpose of Study.....	6-2
6.3.4	Methodology.....	6-2
6.3.5	Geo-morphology.....	6-2
6.3.6	Biocenosis.....	6-3
6.3.7	Frequency of Observations.....	6-6
6.3.8	Biodiversity.....	6-6
6.3.9	Mapping of Biotopes.....	6-6
6.3.10	Installation of New Fish Farms.....	6-7
6.4	Bathymetry.....	6-7
6.4.1	List of equipment and software used:.....	6-7
6.4.2	Control Point.....	6-7
6.4.3	Survey Methodology.....	6-8
6.5	Current Monitoring.....	6-9
6.5.1	Survey Methodology.....	6-9
6.5.2	Results of Survey.....	6-9
6.6	Water & Sediment Sampling.....	6-11
6.6.1	Sampling Methodology.....	6-11
6.6.2	Water Quality.....	6-12
6.6.3	Sediment Quality.....	6-12
6.7	Effects of Fish Feed on the Marine Ecosystem.....	6-12
6.8	Dolphins in the Lagoon.....	6-16
6.9	Artisanal Fisheries in the Lagoon: location of Fish TRaps on the Shoals.....	6-18
6.10	Fish Cages Work as Large Artificial Reefs.....	6-20
7	PREDICTED ENVIRONMENTAL IMPACTS AND POTENTIAL MITIGATING MEASURES.....	7-1
7.1	Impact identification.....	7-1
7.2	Impacts Evaluation and Mitigation Measures.....	7-3
7.2.1	Methodology.....	7-3
7.2.2	Impacts Evaluation and Mitigation Measures.....	7-3
7.3	Summary of Potential Impacts and Mitigation Strategies.....	7-17
8	ENVIRONMENTAL MONITORING PLAN.....	8-1
8.1	Existing Environmental Monitoring Plan.....	8-1
8.2	Proposed Environmental Monitoring Plan during Site Preparation and Implementation Phase.....	8-2
8.2.1	Site Preparation.....	8-2
8.2.2	Implementation Phase.....	8-2
8.3	Proposed Environmental Monitoring Plan during Operation Phase.....	8-2
9	CONCLUSIONS.....	9-1
10	REFERENCES.....	10-1

DRAWINGS (inserted after page)

Drawing No1	FMM – LOCATION.....	4-2
Drawing No2	FMM - MORPHOLOGICAL MAP.....	6-3
Drawing No3	FMM - SENSITIVITY MAP.....	6-6
Drawing No4	FMM – CONTOURS.....	6-8
Drawing No5	FMM - CURRENT MONITORING - RISING TIDE.....	6-10
Drawing No6	FMM - CURRENT MONITORING - RECEDING TIDE.....	6-10
Drawing No7	FMM - CURRENT MONITORING - NEAP TIDE.....	6-10
Drawing No8	FMM - WATER and SEDIMENT SAMPLE LOCATION.....	6-11

APPENDICES

APPENDIX A	Administrative Documents
APPENDIX B	Public Presentation
APPENDIX C	Specialist Report: Geomorphology and Biodiversity Survey
APPENDIX D	Specialist Report: Evolution of the Environment over the Past Years

LIST OF TABLES

Table 2-1: Coastal water quality requirements for various categories	2-3
Table 2-2: Relevant International Treaties and Agreements signed by Mauritius	2-7
Table 3-1: Artisanal fisheries production in tonnes	3-1
Table 3-2: Aquaculture Fish Production in Tonnes (in fresh-weight equivalent)	3-3
Table 4-1: First Schedule Fisheries and Marine Resources Act 2007	4-1
Table 4-2: Effective Coordinates of Fish Farms FMM1 & FMM2	4-1
Table 4-3: New Concessions of FMM	4-2
Table 4-4: Figures for each Type of Cage	4-7
Table 4-5: Comparison of the production methods used by FMM with industrial marine fish farming methods	4-8
Table 4-6: Comparison of Density used by FMM with industrial marine fish farming methods	4-8
Table 4-7: Changes in Salmon Feed Formulation	4-10
Table 4-8: Changes in FMM's Feed Formulation	4-10
Table 6-1: Details of Water & Sediment Sampling Locations	6-11
Table 6-2: Water Quality at Sampling Locations compared to Standards	6-12
Table 6-3: Classification of the type of bottom (Bulut & von Arnim 2008)	6-16
Table 7-1: Matrix of Impacts applied to FMM Coastal Fish Farms	7-2
Table 7-2: Terminology for classifying and defining environmental impacts	7-3
Table 7-3: Summary of Potential Impacts and Mitigation Strategies	7-19

LIST OF FIGURES

Figure 3-1: Cages of artisanal fishermen anchored in front of the hatchery of FMM in Pointe aux Feuilles	3-3
Figure 4-1: Fish Farm of Ferme Marine de Mahebourg	4-2
Figure 4-2: Location of Existing Fish Farms (FMM1 & 2) and Proposed New ones (FMM 3 to 5)	4-3
Figure 4-3: FMM Fish Farms	4-4
Figure 4-4: General Structure of a Fish Farm	4-5
Figure 4-5: General Structure of a Square	4-5
Figure 4-6: General Structure of a Cage	4-6
Figure 4-7: Clean and Fouled Cage Nets	4-11
Figure 5-1: Hatchery Employees Receiving Training	5-1
Figure 5-2: Preparing for Diver Training	5-2
Figure 5-3: Children of Terre de Paix visiting FMM	5-2
Figure 5-4: First Aid Training in the FMM Training Room	5-3
Figure 5-5: Diploma Ceremony of the HACCP Training Course	5-3
Figure 5-6: Recycling of treated process effluent for irrigation	5-4
Figure 5-7: The Junior Amateur Football Team of Bambous Virieux in Their New Outfit	5-4
Figure 5-8: Aquaculture Equipment	5-5
Figure 6-1: Study Area including Existing Fish Farms (FMM1 & 2) and Proposed New Ones (FMM 3 to 5)	6-1
Figure 6-2: Study Area in the Eastern Part of Anse Jonchée Channel	6-2
Figure 6-3: Morphological Map of Study Area	6-3
Figure 6-4: Pictures of the Biocenosis in the Study Area	6-6
Figure 6-5: Sensitivity Map of Study Area	6-7
Figure 6-6: Bathymetry Map of the Study Area	6-8

Figure 6-7: Current Monitoring - Rising Spring Tide	6-10
Figure 6-8: Current Monitoring - Receding Tide	6-10
Figure 6-9: Current Monitoring - Neap Tide	6-10
Figure 6-10: Location of Water and Sediment Sampling.....	6-11
Figure 6-11: Hand Feeding of Red Drum.....	6-14
Figure 6-12: Affected Zone under FMM Cages	6-14
Figure 6-13: Nassa mud snails eating excess pellets on the bottom	6-15
Figure 6-14: Dolphins near the cages of the FMM fish farm (Photo MMCS).....	6-17
Figure 6-15: Dolphins swimming between the fish cages of FMM (Photo Zoe Daguin)	6-17
Figure 6-16: Location of all shoals (C) in the area	6-19
Figure 6-17: Location of Shoals or Haut-Fonds (HF) on which Casiers were found.....	6-19
Figure 6-18: Location of the 3 New Cage Farming Sites	6-20
Figure 6-19: Fishermen fishing with a scoop net inside the FMM fish farm (March 2013).....	6-21
Figure 6-20: Boer fish circling the outside of fish cages at the FMM fish farm (2008).....	6-22
Figure 6-21: Various Fish Attracted By the Hawser and Bouy Fittings.....	6-22
Figure 7-1: Overview of actual and potential ecological effects from marine finfish farms.....	7-2
